

Pooled Group Solutions

Streamlined benefits technology and consulting services to keep your group swimming in sync

Find Your Swim Lane

No matter what swim lane you're in, you deserve a solution that offers consistent, connected, and streamlined benefits support to your members and their employees.

Billing

Keep your balance sheet as clear as water – our system offers you transparency into the resources flowing in and out, all while maintaining absolute accuracy.

Reporting

Access our built-in reporting tool to generate reports on-demand to view and analyze benefits data in real time.

Decision-Making

Unlock member experience and help employees make the best benefit decisions possible – an integrated recommendation engine is the key.

Decrease Risk

Risk in a pooled group can take many forms – generally when something is lacking: financial transparency, employee communication, or member benefits and services. Through our technology platform and support services, Businessolver creates a strong centralized benefits connection to reduce risk across your entire group.

Increase Stability & Growth

We understand that what you want most is to see your pool grow and thrive, giving it increased stability through more lives across which to spread risk. As your rates and benefits evolve, we can offer you that stability to help ensure your pool can weather external changes in finances or benefit policy.

Government

Amid rising healthcare costs and increasing benefit pressures, states have reimagined the pooled insurance model to face modern challenges. Whether your pool was created through state law or a private insurance company, we have the technology platform to give your group the same benefits capabilities and advantages that private employers can take for granted.

Education

Pooled insurance arrangements allow educators to share and spread risk and resources so that the best each system has to offer goes toward benefiting students and the critical employees that support them. While we understand each education pool is unique, our solutions help them achieve a shared goal: benefits security and support for the employees serving our nation's best and brightest.

Specialized Groups

Your pool is unique and therefore you need a technology that understands how to configure to your needs. Part of our process is a full discovery and understanding of your pool, how it functions and the best ways to provide value to your members. Our goal is simple, ensure your members and their employees have the benefits they need, when they need them.

Let us help you lower your costs, reduce your risk,
and enhance the benefits experiences.
