

Activation Paths:

Boosting Your Benefits Signal

ac'ti·va'tion path

noun

/ akti'vāSH(ə)n paTH /

1. a method by which individuals are connected with the right resources at the right time to help them maximize their employee benefits.
2. an opportunity for empathetic employers to support employee well-being while improving their bottom line.

You did it! You researched, RFP-ed and won some budgeting battles. You assembled the best benefits program that your organization could afford to cover the health and well-being of your employees. Sit back and breathe a sigh of relief.

If only it were that simple. Now you have to convince your employees to activate on those programs so your organization can achieve the maximum return on investment.

And it's never been more important. As compliance regulations around transparency increase, you need an all-in-one solution that ensures your employees understand the benefit programs you provide and, just as importantly, how they impact their health and well-being.

Benefitsolver® was built with the necessary tools for an omni-channel engagement strategy that ensures selection to activation. **Our activation paths provide multiple touchpoints for your employees, navigating them to your benefit programs, and increasing the value of your benefits spend.**

Why it matters

Care coordination for individuals with chronic conditions can save employers **\$4,500** per member per year. [Intrado](#)

Telemedicine saves an average of **\$309 to \$1,500** per session over emergency room visits. [Ortholive](#)

Trust through technology

Businessolver’s activation paths are configured to meet your organization’s needs. We offer an omni-channel, integrated approach within a single benefits ecosystem to amplify programs like these:
